

WASHROOM

- Freshens high traffic urinals for full 30 days
- Installs correctly every time
- Releases billions of beneficial bacteria to consume odours at the source

The ultimate splash reducing urinal screen

Available in

Mango
Spiced Apple
Cucumber Melon

TROUGH URINAL SCREEN

Dual Sided Splash Control

This dual sided design controls splash back from both sides of the screen. This takes the guess work out of installation and eliminates the 'wrong side up' errors that can result in extra labor and cleaning costs.

Perfect for High Traffic Areas

The Trough Urinal Screen is designed for high traffic areas and large venues. The Trough screens are also designed to link together to ensure complete coverage of the urinal. And because the screens cover the drains they prevent debris from causing costly plumbing clogs.

Key Benefits

- Perfect for wide base trough urinals
- Great for sports stadiums and larger venues
- Freshens for 30 days
- Toss it in the trough is all the installation necessary
- Tearable tabs to help remind you when to change product
